

## Ergonomic Design

Boosts the daily work efficiency. Exquisite machine design brings users better operating experience

Up to 15.6" touch screen

Up to 23.8" FHD monitor

Dual-wing floating arm

Rotatable control panel

Storage space

Noise reduced design

Adjustable height

Water and dust proof panel

Ease of transportation

Built-in battery

## Nuewa N9

Diagnostic Ultrasound System

# Access to better women's healthcare

Powered by the cutting-edge ZST+ platform and full stack of intelligent functions, the Nuewa N9 features professional and concrete women healthcare solutions. It minimizes fatigue and maximizes convenience throughout the operation process, shortens the learning curve, and helps you carry out smooth diagnoses for a wide range of patients. The Nuewa N9 ensures that women worldwide enjoy equitable ultrasound medical services.

## Precise Imaging

### Excellent Image Platform

The ZST+ platform is an extraordinary innovation, it transforms ultrasound metrics from conventional beamforming to channel-data-based processing, delivering exceptional image quality for infinite imaging solutions with continuous improvements.

### Transducer Family

Transducer

- Single crystal transducers provide deeper penetration with details
- ComboWave transducers enhance imaging sensitivity
- Designed for comfortable gripping
- Wide clinical application coverage, supports more clinical scenarios

### Outstanding Technologies

PSH	iClear	iBeam
HD Scope	Glazing Flow	HR Flow

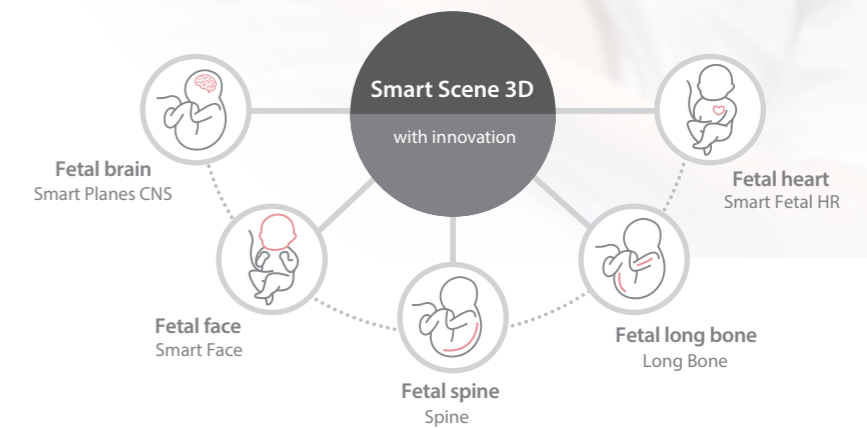

## Efficient workflow

### Women Health Solution

Full-stack smart solution based on Smart Scene 3D

#### Smart Scene 3D

Full-stack smart obstetric solution empowered by ZST+

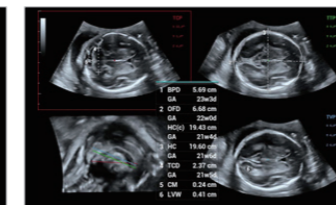

Smart Face

Automatic removal of occlusions over fetal face with one click

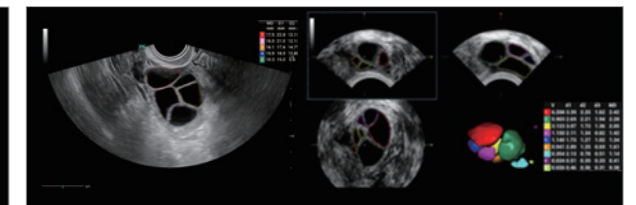

Smart OB

Automatic measurement of fetal biometrics

Smart Planes CNS

Automatic recognition and measurement of fetal central nervous system

Smart FLC 2D / 3D

Automatic follicle counting and measurement in 2D/3D mode

## Innovative Development

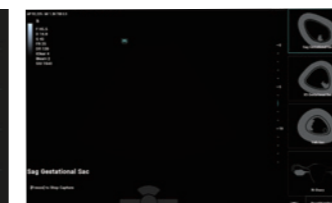

### Inspires growth with every progressive step

Shortened learning curve, enhanced professional improvement

iScanHelper

A scanning tool that allows you to practice skills step by step

iWorks

A standardized protocol, scanning step by step without plane omission
